Fire Detection

NOTES

Commercial plans, which include the technical design analysis, shall bear the seal of a design professional and must include calculations as required.

Work started prior to securing the required permits are subject to a minimum investigation fee of \$200.00. Emergency work, if agreed to by the Chief Building Official, shall be exempt from the investigation fee.

Only the person performing the work may obtain a permit and schedule inspections.

Payments for all permits must be made prior to requesting an inspection.

Installation requiring inspections must not be covered until approved. Failure to receive approval may result in orders requiring the removal of such covering.

Installations must be in accordance with NFPA, the current edition of the adopted Ohio Building Code (OBC), Ohio Mechanical Code (OMC) and referenced documents.

Requests for field inspections must be made a minimum of 24 hours in advance and will be scheduled for the next working day.

Applicants on the schedule for the day's inspections may contact the respective inspectors during the morning from 8:00 am to 8:45 am for consultation or scheduling time.

An additional \$45.00 reinspection fee may be imposed for work that is not properly installed, is not ready for inspection, has changed from the approved plans or is not accessible at the time of the inspection.
