23 W. Pleasant Street, Springfield 45506

call us!

In the Springfield area, getting rid of lead poisoning seems like an impossible task. Over 80% of homes in our area contain lead paint. Children aged 6 and younger are most at risk for lead poisoning. Lead affects the brain in children, often making learning difficult.

CLEAT has a plan.

CLEAT is comprised of a group of agencies in Springfield and Clark County whose focus is eliminating lead poisoning in the area. We come together regularly to share ideas and suggestions regarding blood lead testing, housing inspections and governmental laws surrounding the issue of childhood lead poisoning.

CLEAT needs your help to end lead poisoning...contact us when you feel that a child is lead poisoned and/or if you feel that a home contains lead hazards.

With your help, we can reduce the risks of lead poisoning in our area.

Help us...to help you!
