

RESULT ANALYSIS OF ONLINE POLL:

The Impact Group conducted an online poll that mirrored the telephone survey for the City of Springfield. Although this is not statistically accurate, here are some findings.

MAJOR FINDINGS:

- The results show that 50% of respondents were for a tax increase and 50% against a tax increase before the end of the poll.
- After all information was shared, these results changed to 55% for and 45% against.
- The overwhelming majority of respondents claim that the police are their number one priority when it comes to important services.
- Those that were against the tax increase declared so vehemently in the comments, citing high salaries and wasteful spending by the city.
- Two thirds of respondents claim to have known about the tax increase and the same percentage have negative view of where the city is heading.
- The majority of people have live in Springfield for more than 20 years.
- Newspaper is the media most used to receive city information.
