The Global Education and Peace Network began when a small group of committed Springfield citizens decided that they needed to “do something” in response to the events of September 11, 2001.

The Sixteenth Annual Global Education Calendar and Speaker Series is the fruit of that labor. The Global Education Series provides an opportunity for our community to be exposed to other ethnic groups, cultures, and religions as a way of increasing understanding and therefore, respect for those who are different from us.

Please join us for the monthly Global Education Speaker Series and help us build bridges within our own global community.
